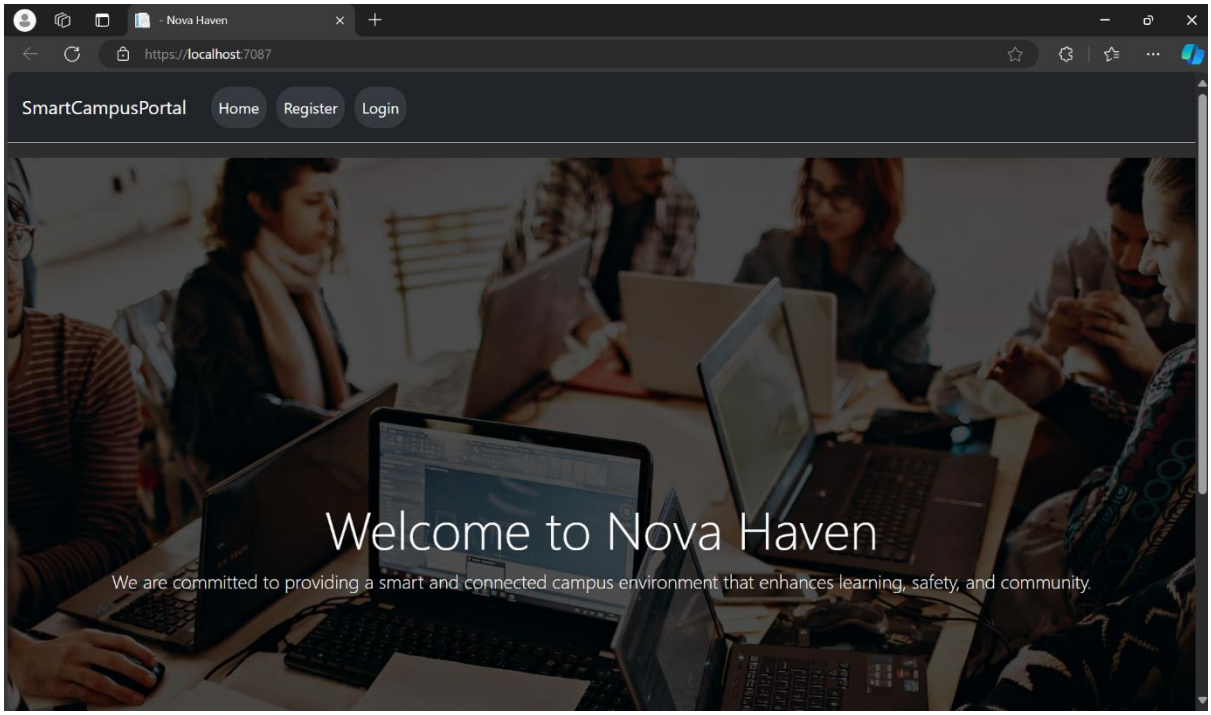
SOFTWARE DEVELOPMENT WIL 2024

SMART CAMPUS WEB APP DONE BY: SBAHLE CANDICE SIBIYA, THAMSANQA NGCOBO AND SIPHESIHLE MILLER.

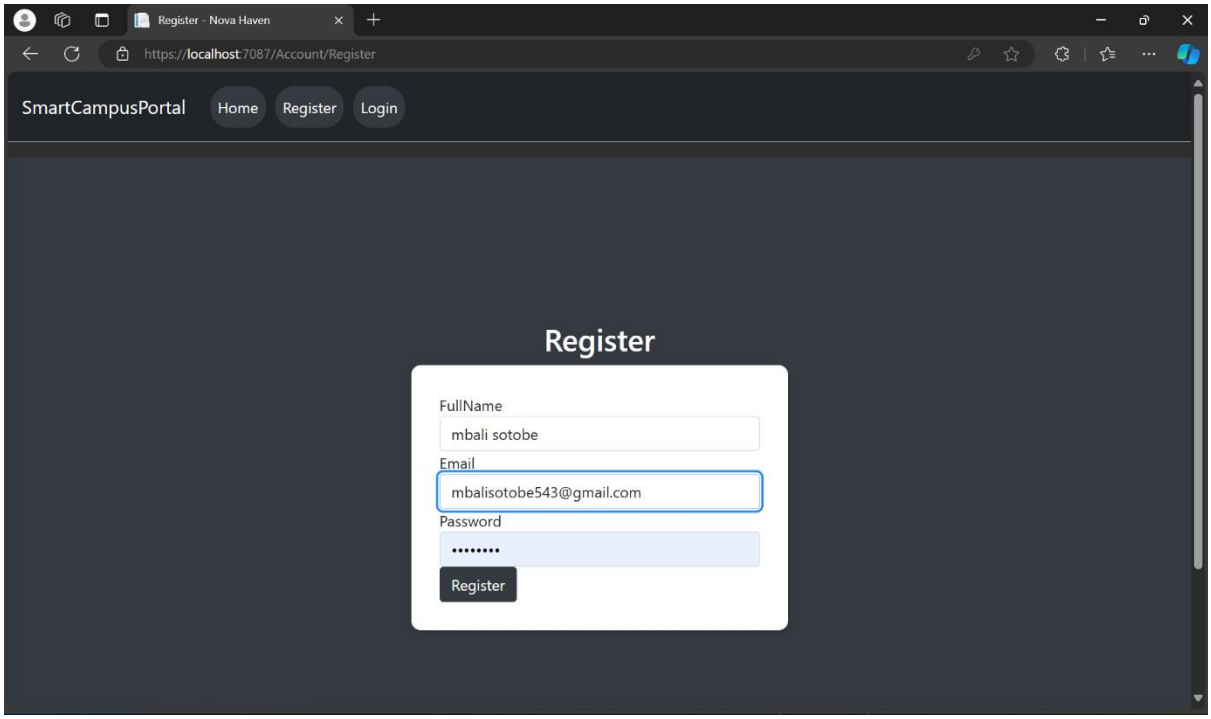
<u>README File</u>

The Smart Campus App was designed as a way to address key aspects of campus operations and student interactions. This project aims to create a platform that facilitates secure login and registration processes, enables real-time communication among campus members, and provides a robust system for reporting and managing campus incidents and emergencies.

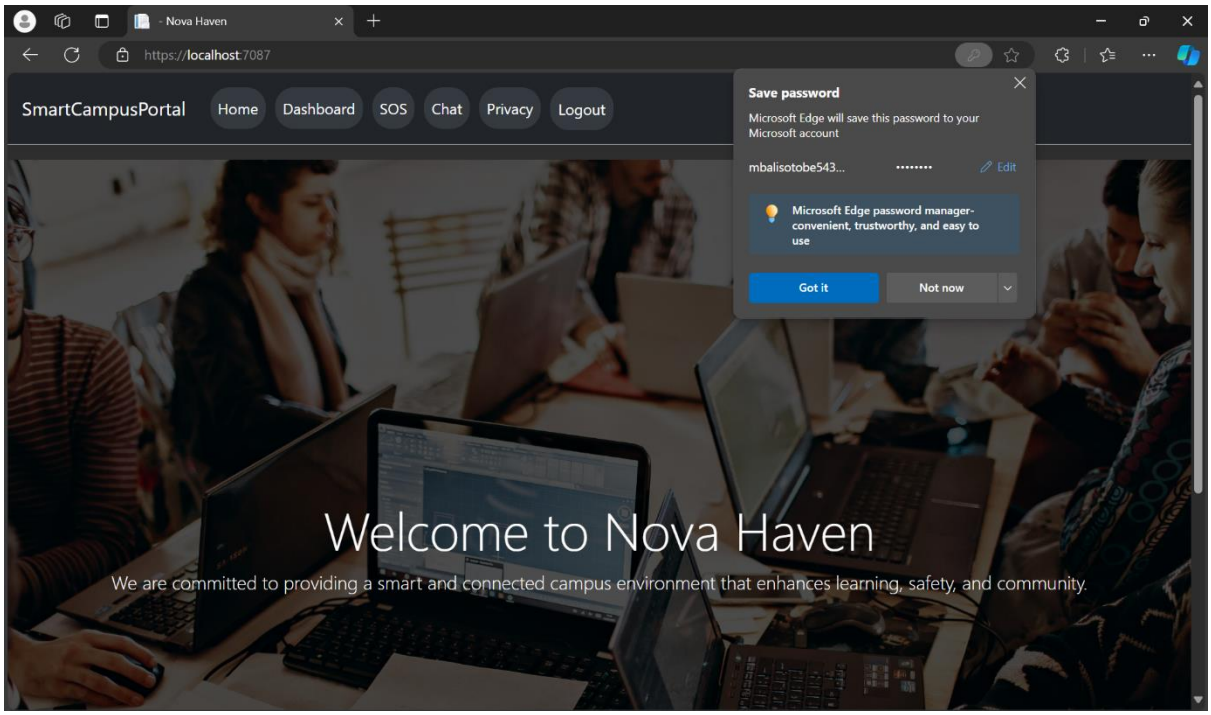
1. The Login, Registration and dashboard pages created by sbahle



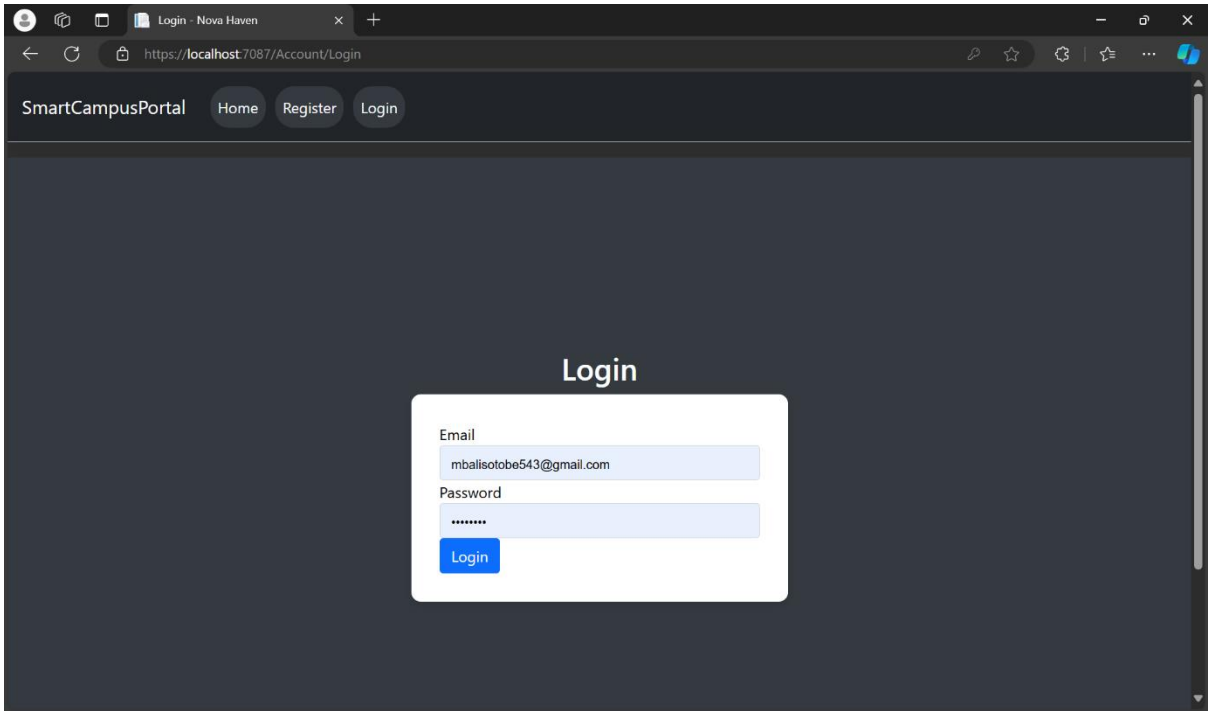
This is the home page of the project/app 'NovaHaven'. On this page the user will find two buttons, one for registering and the other for logging in, which is what the user will click on to fully access the website.



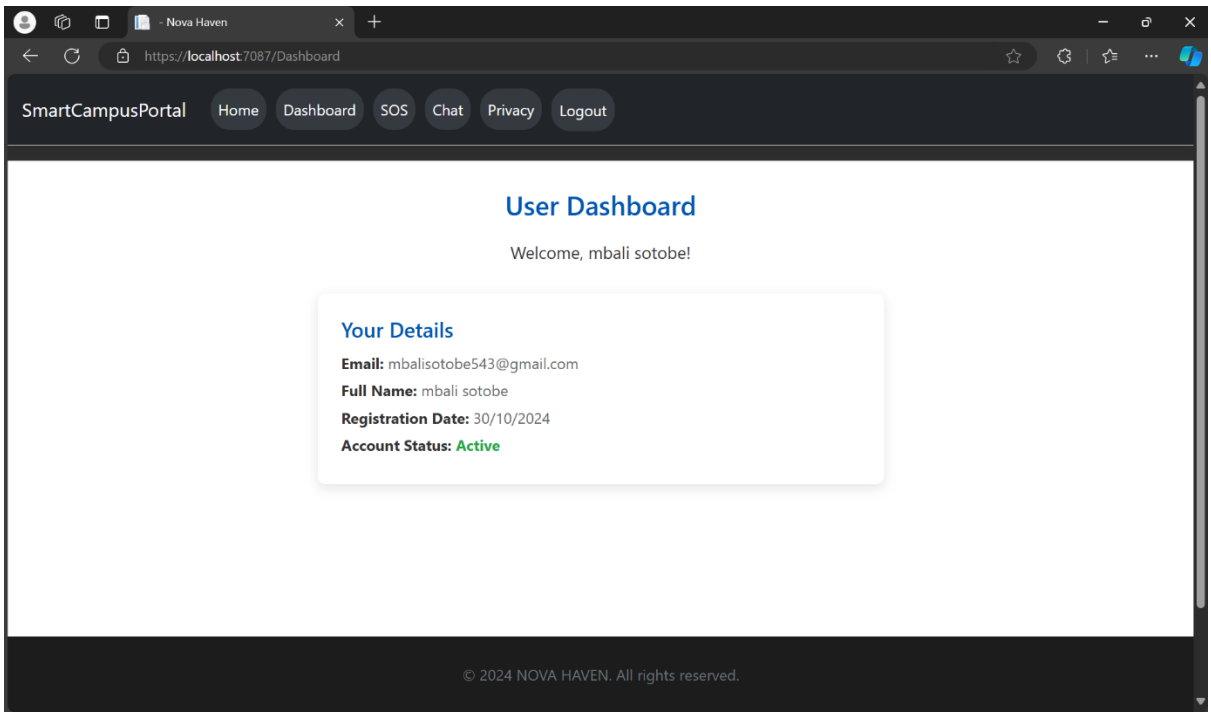
2. This is the register page which is where the user would register their account if they are new to the site. They will be prompted to enter their full name, email address and password. When they are done they will click the register button to add their information to the system.
3.



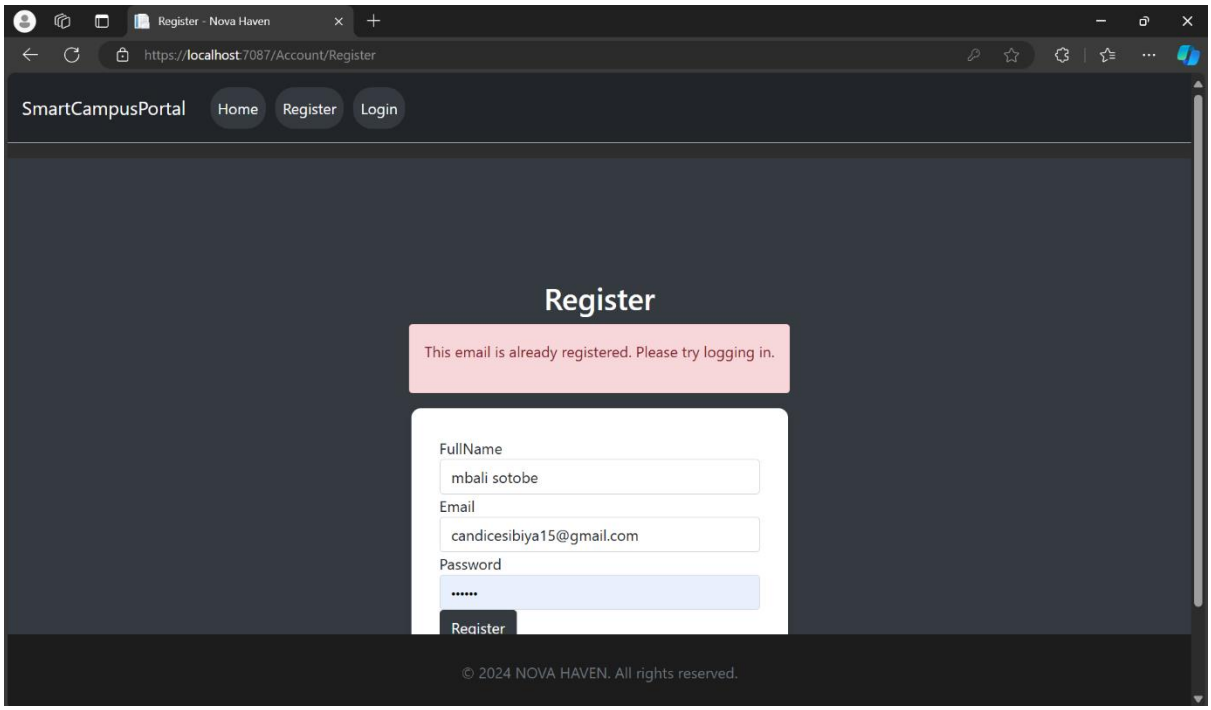
3. If the user filled in their details correctly the browser will save their details aswell as redirect the user back to the home page.



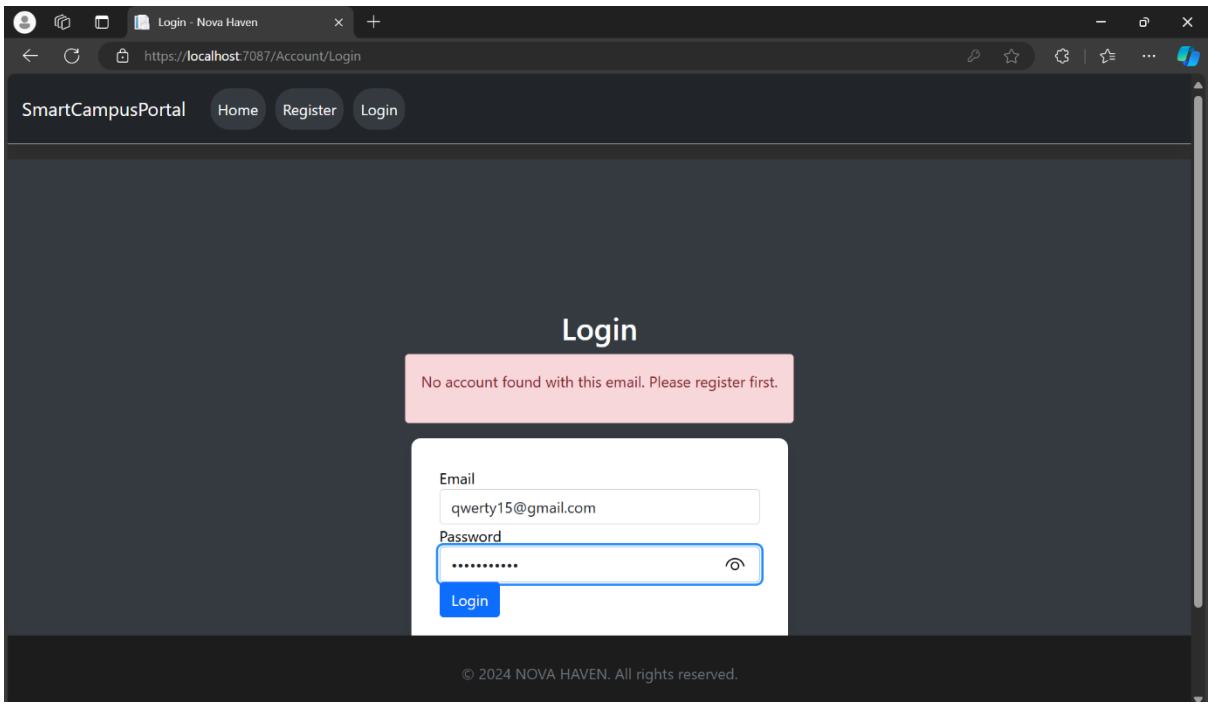
4. Once the user's details are saved to their Microsoft account, their details will be autofilled onto the form.



5. After the user successfully logs in, they are taken to a dashboard that welcomes the user by their name and displays their details on a card. The details included their email address, their full name, the date they registered as well as their account status which is active once they've logged/registered and inactive when they aren't logged in. They will also find new tabs on the navigation bar for the Dashboard, SOS, Chat and Privacy pages as well as log out button which will take them back to the home page.



6) In a scenario where a user who has already registered tries to register again, an error message that asks them to log in, immediately pops up.



7) In a scenario where a user who doesn't have an account (who hasn't registered an account) tries to log in, an error message will pop up stating that there is no account found for them and they asked to register first.

SOS Page done by THAMSANQA designed by sbahle

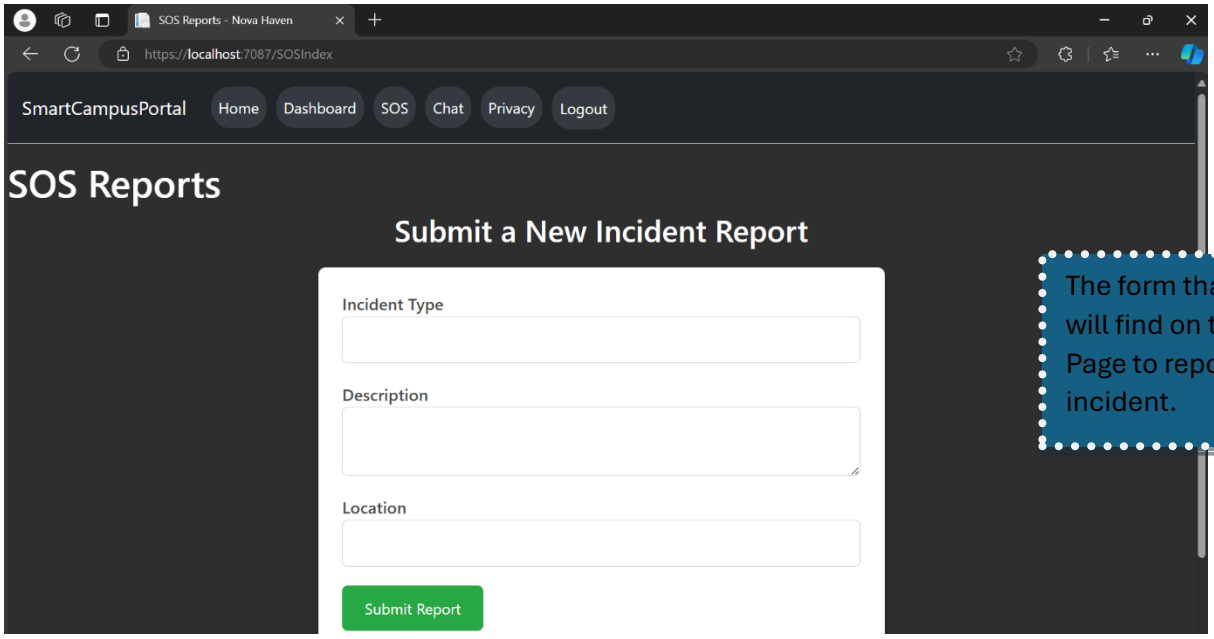
The SOS Page allows users to Report incidents and emergencies, see the incidents and emergencies and their statuses, view the details of each, edit them, and delete a report aswell. This guide explains how to use each feature on the page.

Features

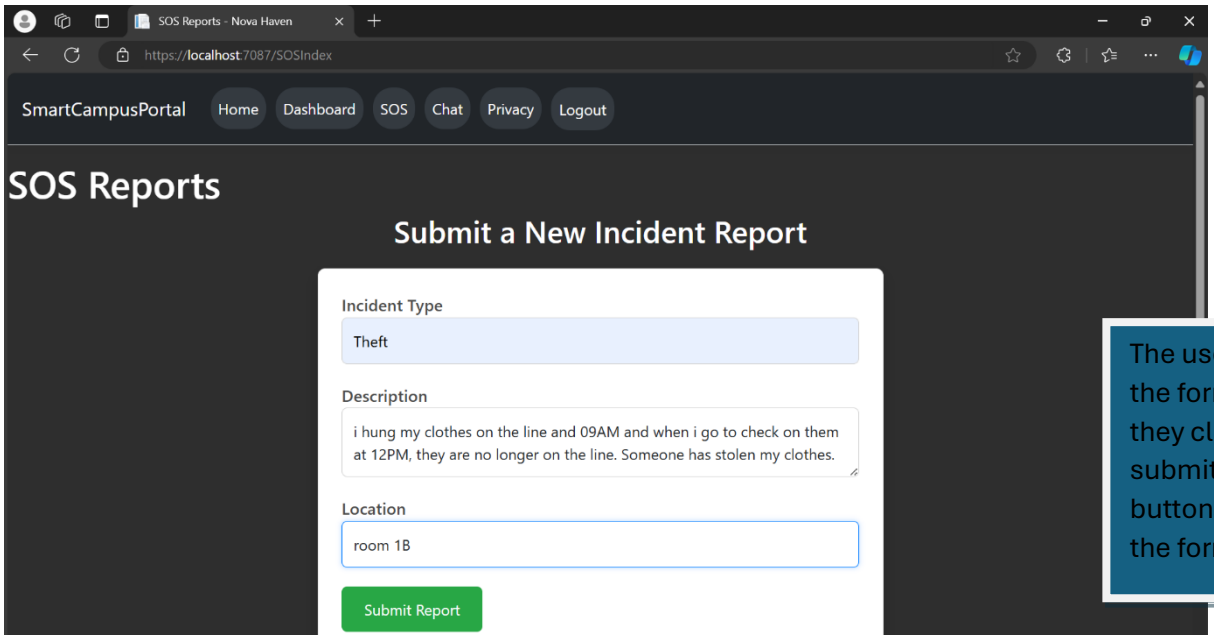
1. **Submitting a Report**
    - Fill out the form with details about the incident.
    - Click Submit to add the report to the table below.
    - Once submitted, your report will appear in the list of incidents.
2. **View a Report**
    - In the table, each report has a View button.
    - Click View to see more details about the incident.
    - On the details page, click Back To The List to return to the main page.
3. Edit a Report
    - Each report also has an Edit button.
    - Click Edit to go to a page where you can change the report details.
    - After editing, you can choose to:
        - Click Save to update the report.
        - Click Back to cancel changes and return to the main page.
4. **Delete a Report**
    - To remove a report, click the Delete button next to it in the table, a pop up will appear asking if you are sure about deleting the report, click yes.
    - This will then permanently delete the report from the list.

Summary

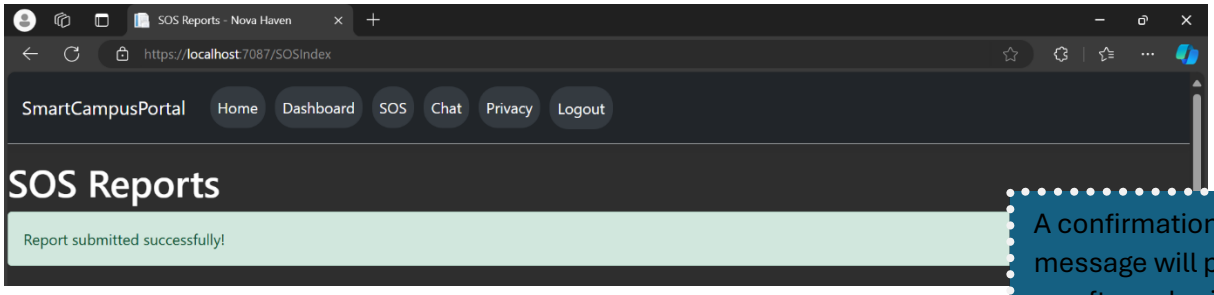
The SOS Page is a simple and user-friendly page for reporting incidents and emergencies that happen on campus. You can see any reports already submitted and edit or delete reports. The page is easy to use, and this guide is also available to assist you in interacting with the page.



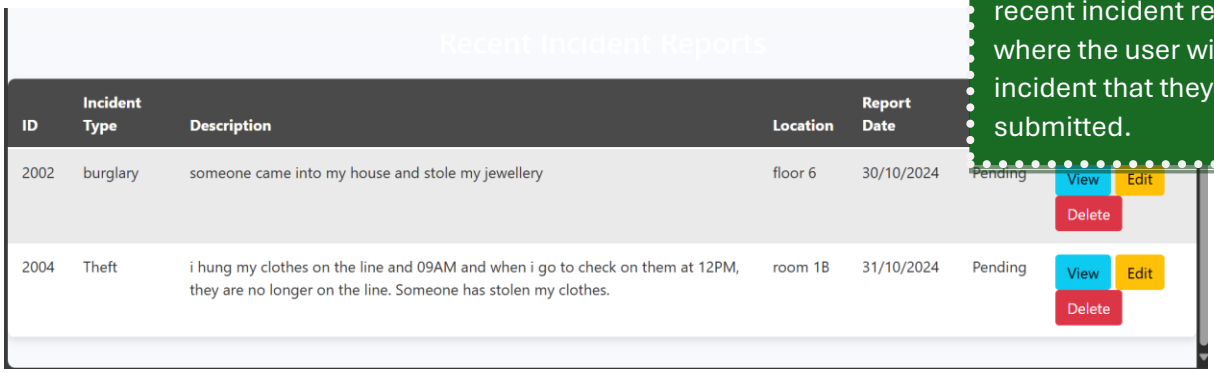
The form that the user will find on the SOS Page to report an incident.



The user fills in the form and then they click the submit report button to submit the form.



A confirmation message will pop up after submitting the report.



Recent Incident Reports

ID	Incident Type	Description	Location	Report Date		
2002	burglary	someone came into my house and stole my jewellery	floor 6	30/10/2024	Pending	View Edit Delete
2004	Theft	i hung my clothes on the line and 09AM and when i go to check on them at 12PM, they are no longer on the line. Someone has stolen my clothes.	room 1B	31/10/2024	Pending	View Edit Delete

Beneath the form is the recent incident reports where the user will find the incident that they have submitted.
